**Project’s Full Title**

Smart Control Systems for Energy Management: New Master Degree.

**Description**

This project main objective is to increase public awareness and utilization of renewables, promote for energy saving and management, as well as develop new research areas in those fields. Based on surveys and questionnaires from previous projects Clean Energy and Research in Environmental Studies and Master on Sustainable development and Renewable energy, a solid conclusion for the establishment and developing a training course and a master program was evident.

**Partners**
